Professional Profile

A Software Developer with 2+ years of experience building **RESTful APIs** and **full-stack applications** using **.NET, Node.js, and SQL/NoSQL databases**. Strong foundation in **API design, database modelling, and scalable frontend and backend architecture**, with hands-on experience in **cloud deployment and CI/CD pipelines**, integrating third-party services and building **production-ready applications**. Experienced in developing modular and maintainable systems with a focus on **performance, scalability, and clean architecture**.

Skills

Languages: C#, JavaScript, TypeScript, Python, Java, C++ | **Frameworks & Libraries:** .NET, Node.js, Express, React | **Databases:** SQL Server, PostgreSQL, MySQL, MongoDB | **Tools & Platforms:** Git, Docker, Postman, Jenkins, Figma, Lucidchart, Vercel, Render, Resend | **Concepts:** REST APIs, API Integration, OOP, System Design, Scalable Architecture

Professional Experience

BixiHomes & Renovations Inc. - Full-stack Web Developer (2025 - Present)

- Developed and deployed a **full-stack web application** to handle customer inquiries and service requests.
- Built **backend services** using **Java/Node.js** to process contact form submissions and manage user input.
- Implemented **API endpoints** and **server-side validation** to ensure reliable **data handling**.
- Deployed backend services using **Render** and **integrated frontend workflows** using **Vercel** and other **SaaS implementations** such as **Resend** for **real-time communication**.

Enabled Talent - Full-stack Web Developer (2025)

- Contributed to the development planning for Career Center Dashboard by analyzing **API endpoints and backend data requirements**.
- Documented **frontend-backend integration** workflows for **sandbox-based API systems**.
- Evaluated **dashboard tooling options** (including analytics solutions) with a focus on **scalability and system integrations**.

GoodLife Fitness - Personal Trainer (2024 - Present)

- Delivered **structured personal training programs** while maintaining **strong client retention and satisfaction**.
- Maintained **strong communication with clients and management** while balancing professional responsibilities with software development studies.
- Evaluated **training programs** through **goal analysis, progress tracking, and clear communication** to improve client outcomes.

Projects

BixiHomes & Renovations Inc. - React.js, JavaScript, Node.js, Express, Tailwind CSS, Vercel, Render, Resend

- Developed a business website with backend integration to handle customer inquiries and service requests.
- **Built and deployed backend services** to process **contact form submissions** and **manage user communication**.
- Integrated **frontend and backend workflows** to enable real-time request handling by deploying the application using **cloud platforms with CI/CD integration**.

Enabled Talent Dashboard - React.js, TypeScript, Node.js, Express, PostgreSQL, Tailwind CSS, Vercel, Render

- Developed a **full-stack dashboard** to **manage and track students with disabilities, job opportunities, applications, and placement outcomes**.
- Built the frontend using **React and TypeScript**, creating structured and maintainable UI components for data visualization and management.
- Designed and implemented **RESTful APIs** with **secure authentication** and **PostgreSQL** data persistence.
- Deployed the application using **Vercel (frontend)** and **Render (backend)**, integrating **GitHub for CI/CD-based automated deployments**.

Memory Battle - C#, .NET, SQL Server

- Developed a **C#/.NET memory game** featuring a persistent leaderboard system backed by **SQL Server**.
- Implemented database **CRUD operations** using **parameterized SQL queries** to securely store and retrieve player scores.

Bow Course Registration - React.js, Node.js, MongoDB, Mongoose, HTML, Tailwind CSS

- Developed a **full-stack course registration platform** enabling course enrollment, retrieval of available courses, and instructor notification workflows.
- Implemented **RESTful APIs** with **CRUD operations, secure login/authentication, and MongoDB persistence**.

AI assistant app - Python, Flask with Spotify API, LLaMA-based AI Integration

- Built an **AI-powered** music assistant integrating **LLaMA-based** natural language processing with **Spotify API endpoints**.
- Enhanced app functionality by connecting AI-driven inputs **with real-time API responses**.

Education

Bow Valley College, Calgary - Software Development Diploma (2024 - 2025)

- **Cumulative GPA: 3.80/4**

Batangas State University - The National Engineering University-Alangilan - Bachelor of Science in Computer Science (2021 - 2022)

- **Dean's List - First year, 2nd Semester: GWA: 3.3696/4**

Relevant Experience

Association of Committed Computer Science Students - Vice President (2022)

- Handled the **technical team** of the organization and provided a fun and healthy environment during council meetings.
- Led and organized a Hackathon event that was attended by **40 students citywide**.

College of Informatics and Computing Sciences Student Council - Public Relations Officer (2022)

- Managed **50%** of **visual content, publication materials, and social media captions** for different media postings **across different social media platforms**.
- Spearheaded the Hackathon Event in collaboration with the **Department of Information and Communications Technology Philippines** to launch a **city-wide webinar** about **technology/cybersecurity**.

Volunteer Experience

Affinity Mentorship Foundation - Web Developer & Designer (2024 - 2025)

- Led **80%** of website redesign using **Figma, CSS, HTML, JavaScript, and Squarespace**.
- **Improved site usability and navigation**, resulting in **positive feedback** from board members and **increased engagement**.
